CAREER OBJECTIVE

Computer Science undergraduate (AI & ML) with a strong foundation in Java, object-oriented programming, web development, SQL, and REST APIs. Eager to join Accenture as a Custom Software Engineer, build expertise in enterprise application development and IT service management, and contribute to delivering high-quality software solutions. Fast learner with a 9.6 CGPA, two industry internships, and a National Hackathon win — committed to adding value from day one.

INTERNSHIP EXPERIENCE

AI Virtual Intern — Infosys Springboard

January 2026 – March 2026

- Built a Fake News Detection and Verification Tool using Python — designed the complete application pipeline including data collection, processing logic, and output validation, gaining experience in end-to-end software development practices.
- Collaborated with project supervisors following Agile methodology — participated in sprint planning, iterative development cycles, and review sessions aligned with real-world software delivery frameworks.

Tech Lead Intern — Swecha (Vishwam.AI Initiative)

May 2025 – July 2025

- Led a team of engineers in designing and delivering AI-based software solutions — managed task allocation, sprint planning, and milestone tracking across the project lifecycle.
- Coordinated version control using Git and GitHub, conducted code reviews, and produced technical progress documentation for programme coordinators and stakeholders.

PROJECTS

MentorLog — Academic Operations Platform

github.com/vinaybethala/mentorlog

Python | FastAPI | PostgreSQL | REST APIs | GenAI APIs

- Developed a full-stack web application for academic session and attendance tracking — built REST API endpoints, designed the database schema, and integrated third-party APIs to automate data workflows and generate reports.

EduEarn — Learn-to-Earn Education Platform

github.com/vinaybethala/eduearn-learning-platform

JavaScript | React | SQL | REST APIs | Git | 2nd Prize — National Hackathon

- Designed and built a full-stack education platform with a React frontend and SQL backend, delivering user management, course tracking, and reward logic within a structured application.
- Won 2nd Prize at a National Level Hackathon — demonstrated ability to deliver a complete, functional software product under competitive and time-constrained conditions.

EDUCATION

B.Tech — CS & Engineering (AI & ML Specialisation)

CGPA: 9.6 / 10.0

St. Peter's Engineering College, JNTUH, Hyderabad | 2023 – 2027 (Expected)

Intermediate — Class XII (MPC)

97.1%

Sri Gayatri Junior College, Armoor | 2021 – 2023

Secondary School Certificate — Class X

GPA: 10.0 / 10.0

Sri Narayana High School, Bheemgal | 2020 – 2021

TECHNICAL SKILLS

Programming:	Java (Intermediate), Python (Basic), C, JavaScript
Web Development:	React, HTML, CSS, REST APIs, Basic application development using AI-assisted tools
Databases:	SQL, PostgreSQL, Basic database design and query writing
Software Concepts:	Object-Oriented Programming, Data Structures & Algorithms (Intermediate), SDLC, Agile / Scrum
Tools:	Git, GitHub, FastAPI, Version Control, Technical Documentation

CERTIFICATIONS & ACHIEVEMENTS

- Python Foundation Certification — Infosys Springboard
- The Joy of Computing Using Python — NPTEL, Indian Institute of Technology
- Software Engineering and Agile Software Development — Infosys Springboard
- 2nd Prize — National Level Hackathon (EduEarn Platform)
- 2nd Prize — Tech Triathlon, Osmania University Engineering College
